the 1990s, the number of people with a university degree in Brazil increased from 1.5 million to 4.5 million, and the number of people with a high school diploma increased from 10 million to 20 million (IBGE 2000). The increase in the number of people with a university degree is particularly striking, as it represents a 200% increase in a period of only 10 years.

These changes in the educational profile of the population have led to a significant increase in the demand for higher education. In 1990, there were only 1.5 million people with a university degree in Brazil, and by 2000, this number had increased to 4.5 million. This increase in the number of people with a university degree has led to a significant increase in the demand for higher education.

The increase in the number of people with a university degree has led to a significant increase in the demand for higher education. In 1990, there were only 1.5 million people with a university degree in Brazil, and by 2000, this number had increased to 4.5 million. This increase in the number of people with a university degree has led to a significant increase in the demand for higher education.
